## **DETAILED ACTION**

### ***Allowable Subject Matter***

---

Claims 4-18 and 20-49 are allowed.

### ***Reasons for allowance***

1. The following is an examiner's statement of reasons for allowance:

Regarding claims 4 and 26, Ichiya et al. (5,544,001) appear to be the closest prior art reference. Ichiya et al. teach substantially the entire claimed structure, as recited in claims 1 and 2, and 26, respectively, except a support member comprises an S shaped.

Regarding claim 20, Ichiya et al. (5,544,001) appear to be the closest prior art reference. Ichiya et al. teach substantially the entire claimed structure, as recited in claims 1, 2 and 19, except a stress-inducing layer on the upper surfaces of the first and second support members inducing a compressive stress on the support member to cause it to bend away from the lower surface upper portion of the body.

Therefore, prior art do not teach or render obviousness the semiconductor structure, as claimed.
